

PATIENT REFERRAL SUMMARY

Date: January 20, 2026

To: Treating Physician / Specialist

Re: Medical Report Finding Summary

Dear Provider,

The patient has processed their medical records through an AI screening tool. The following summary highlights key findings, abnormalities, and potential risks extracted from the documents. This summary is intended to facilitate your review.

Key Clinical Findings

The patient's blood sample was collected 15-Jan-2026 at Sunshine Health Center (Sunshine Health Center). The patient is a 45-year-old male with no major complaints reported. The patient was diagnosed with mild hyperlipidemia (high cholesterol).

Identified Abnormalities / Risks:

- Total Cholesterol > 200 (Moderate Risk)

Thank you for reviewing this patient's case.
